CAREER PLANNING SERVICES

The choice of a career field is an important and difficult decision an individual must make. Career decisions should be based on a thorough knowledge of one’s interests, skills, labor market information, and training programs. Students can assess and identify their interests, and match those interests with occupations in Florida, through Florida Virtual Campus, www.flv.org. We are available to help students achieve self-direction in career decision-making and planning. For assistance in identifying and achieving career and educational goals, contact Advising Services at (305) 809-3196 or email advising@fkcc.edu.
