COLLEGE-LEVEL COMPETENCIES

Florida Keys Community College strives to ensure that its graduates who complete the core curriculum possess the knowledge, skills and values associated with college-educated individuals. A method for accomplishing this is to assess general education, the core curriculum, each semester to identify that graduates demonstrate proficiency in competencies that are integrated within the academic disciplines. In

These competencies include the ability to effectively communicate, seek creative solutions to problems, exhibit cultural awareness, and command basic technological skills. Students who acquire proficiency in these areas have an enhanced opportunity to experience the positive impact of education, which can, in turn, ignite a passion for continual, life-long learning.

FKCC’s General Education Competencies:

- Communication
- Critical Thinking
- Global, Cultural, Environmental Awareness:
- Technology
