ASSOCIATE IN APPLIED SCIENCE DEGREES (A.A.S.)

The Associate in Applied Science degree is a college-level career and technical education degree. Graduates are prepared for immediate entry into the workforce and have the communications, problem solving, and academic skills necessary to successfully compete in the job market and advance in the workforce. The Associate in Applied Science degree provides the same career preparation as the Associate in Science degree, but is not designed as a college transfer program. The degree may transfer to some universities under special articulation agreements between FKCC and the university.
